Ergo-panel
screen system

900h screen
Ergo Frame height adjustable

The Ergo-Panel 50 is an all Australian, extremely versatile modular screen system that is made in Melbourne.

The screen is fully customizable, giving the client complete control and flexibility over size, style, colour and functionality.

Desk mounted or free standing, the screens can be seamlessly integrated into DDK's extensive workstation systems utilising the universal power pole/post.

Fully integrated cable management systems are available in any number of positions on the screens with the ability for both soft wired or hard wired options.
